The following is an examiner's statement of reasons for allowance:

The instant specification notes, e.g., at page 72, first paragraph, that lentiviral production in the art was accomplished by relatively inefficient transfection methods at a small (batch) scale, and that the use of flow electroporation solves this problem. As such it would not have been obvious to have combined transfection of the binary viral vector with a flow electroporation method, e.g., as taught in Meserol, of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James S. Ketter whose telephone number is 571-272-0770. The examiner can normally be reached on Monday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Remy Yucel can be reached on 571-272-0781. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
